PRESENTATION OVERVIEW

OUR MOTIVATION

CONTEXTLY is a *Slack-integrated AI platform that detects emotional tone in real time to reduce miscommunication in remote teams. We are committed to helping organizations build healthier communication cultures through emotional awareness.

PROBLEM

MARKET GAP

Remote teams rely on text, but tone is lost, ultimately leading to frequent miscommunication.

CUSTOMERS

Remote workers and managers struggle to interpret intent and emotional context in daily messages.

COSTS

Teams waste time resolving misunderstandings that could have been prevented with clearer tone visibility.

USABILITY

Customers want a tool that fits seamlessly into Slack; no new apps, no learning curve.

FINANCIALS

Miscommunication costs companies millions annually through delays, conflict, and turnover

SOLUTION

CLOSE THE GAP

We restore emotional tone to text-based communication, giving remote teams clarity that no other Slack tool provides

COST SAVINGS

Reduce delays, conflict, and turnover by preventing miscommunication before it escalates.

TARGET AUDIENCE

Remote teams, managers, and HR/People Ops seeking clearer, healthier communication.

EASY TO USE

A seamless Slack integration product that provides emotional insight directly in the messages teams already send.

PRODUCT OVERVIEW

UNIQUE

Only tool that brings real-time emotional tone detection directly into *Slack conversations.

FIRST TO MARKET

The first seamless *Slack integration that visualizes 8 core emotions for remote teams in real time.

TESTED

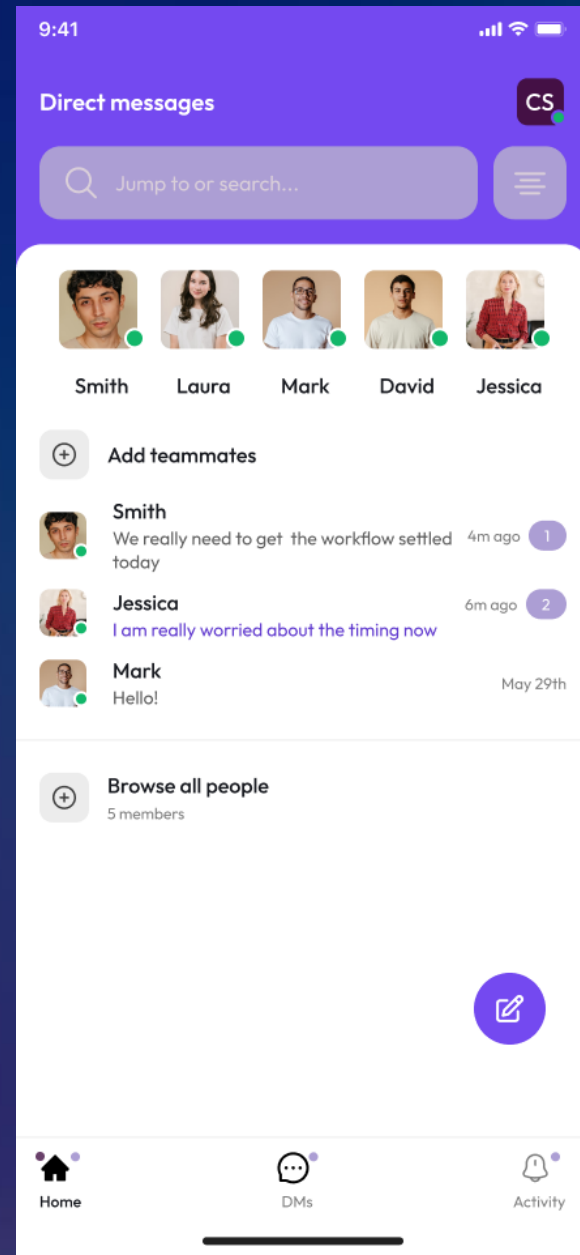

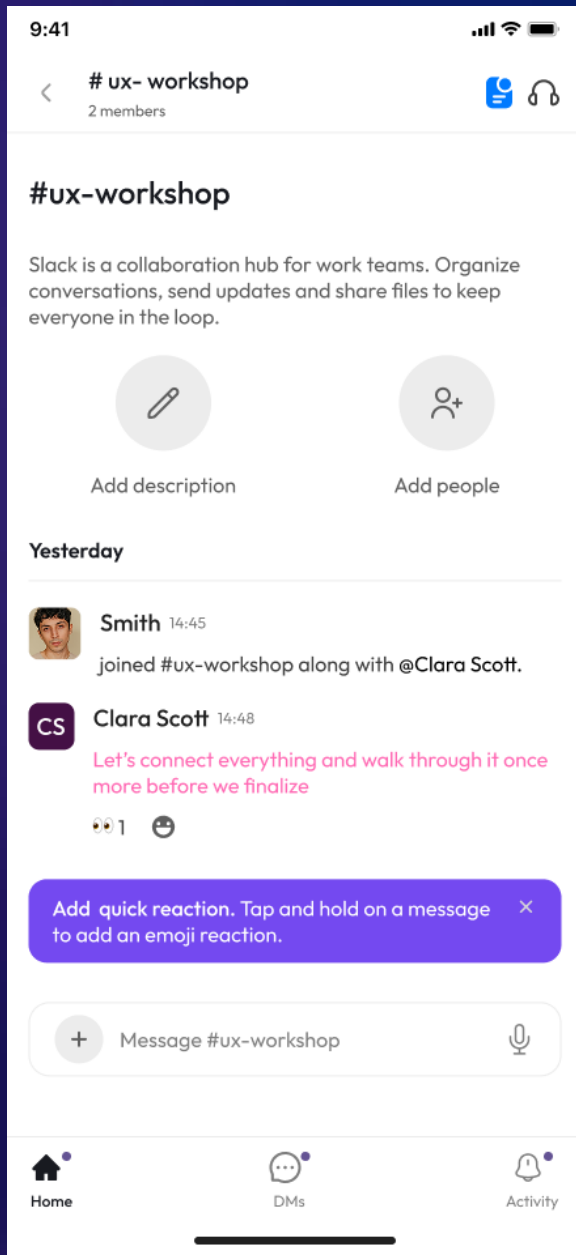

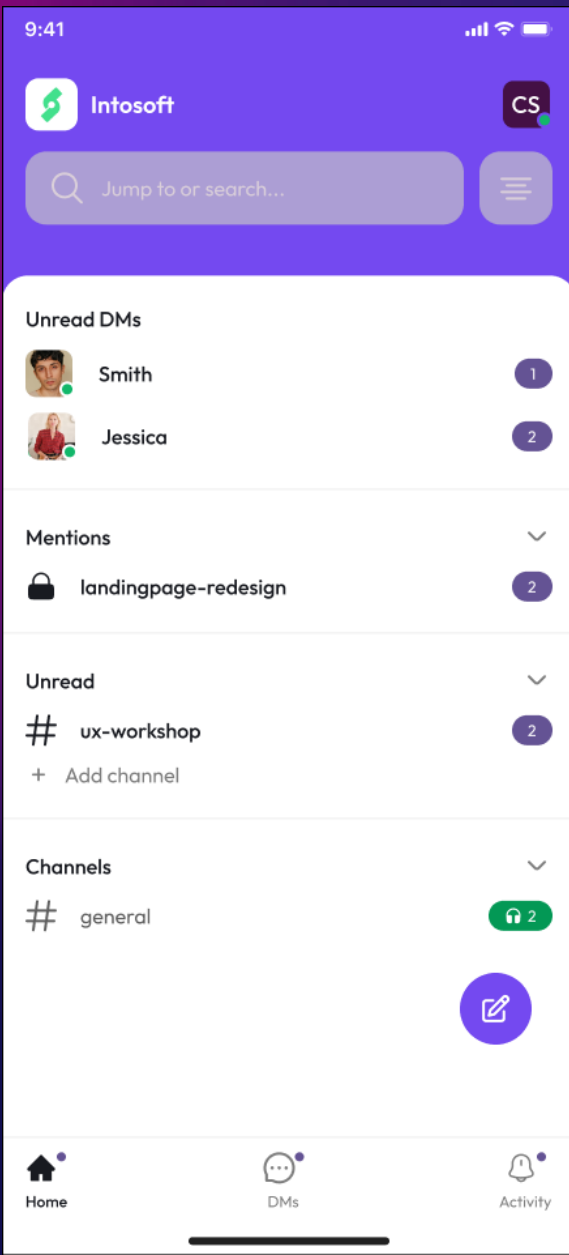

Conducted testing with peers, *but no integration yet*

INSIGHT-DRIVEN

Provides clear emotional visibility that helps teams understand tone instantly and avoid miscommunication.

PROTOTYPE

PRODUCT BENEFITS

Reduces misunderstandings by revealing emotional tone in real time.

Helps teams align faster and avoid delays caused by misinterpreted messages.

Surfaces frustration, confusion, or worry early, reducing problem escalation

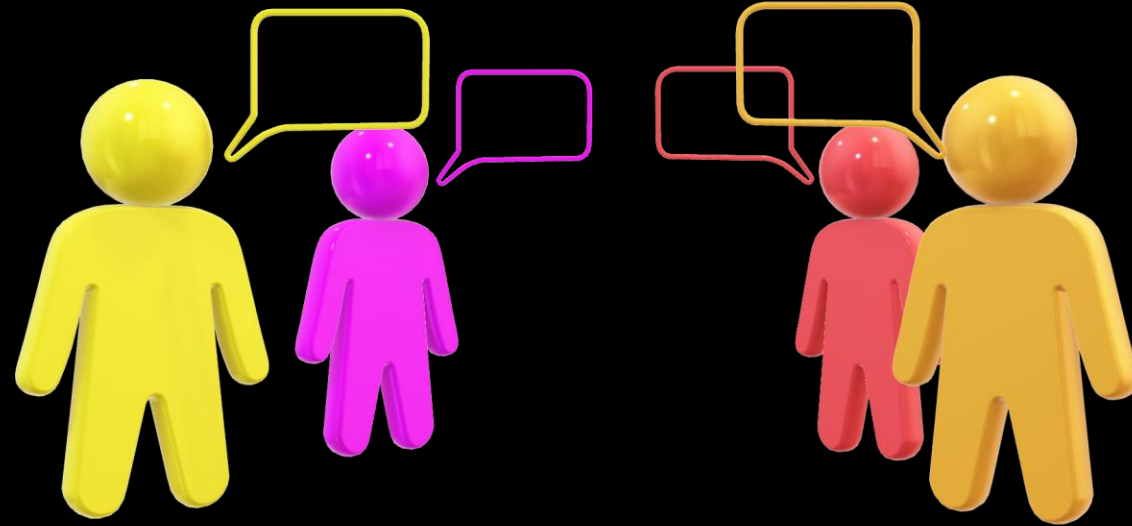

TECHNICAL ASPECT

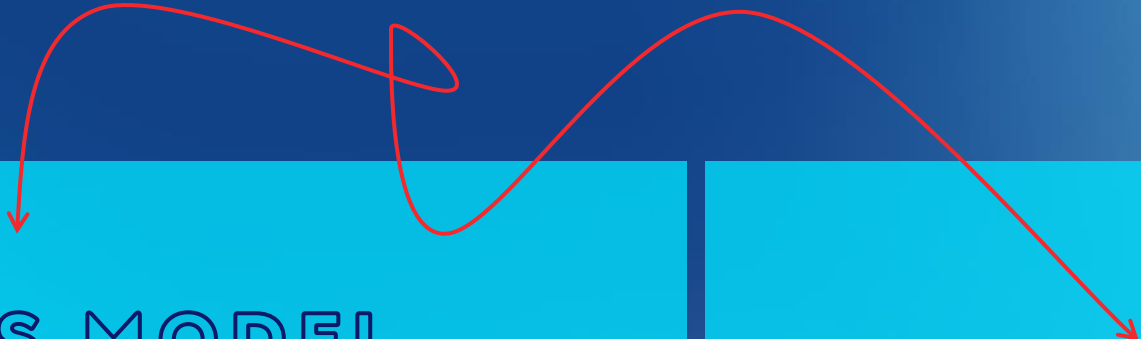

Emotions	Color Map
Joy	Green
Love	Pink
Surprise	Yellow
Anger	Red
Sadness	Blue
Fear	Purple
Disgust	Brown
Neutral	Grey

ML Specs	
Metrics	Accuracy + F1-score (84%)
Model	DistilRoBERTa (fine-tuned)
Dataset	8-class labeled emotion
Testing	10% held-out evaluation
Credibility	Balanced performance across classes

COMPANY OVERVIEW

BUSINESS MODEL

REVENUE STREAM

Subscription-based SaaS billed per employee or per team (B2B). Pilot Product will be implemented as freemium

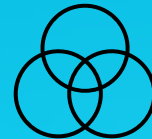

TARGET BUYER

HR, People Ops, Team Leads, and Remote-First Organizations

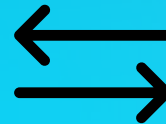

CORE VALUE

Reduces miscommunication → improves efficiency → lowers conflict + turnover

DIFFERENTIATOR

Real-time emotional tone detection inside Slack; no other tool provides 8-emotion visibility.

ADOPTION STRATEGY

Frictionless Slack integration; easy pilot → smooth organization-wide rollout.

SCALABILITY

Expand to Microsoft Teams, email, Jira, and analytics dashboards.

MARKET OVERVIEW

\$45B

Global enterprise collaboration
& communication software
spend

Total addressable market

\$16.5B

≈35% of TAM, based on
remote/hybrid work share

Serviceable available market

\$0.8B

Portion of SAM we could realistically
capture long-term by focusing on
remote-first companies and
HR/People Ops buyers (≈5% of SAM).

Serviceable obtainable market

A robotic hand and a human hand are shown on the left side of the slide, reaching towards each other. The robotic hand is white with red joints, and the human hand is a realistic skin tone. They are positioned vertically, with the robotic hand at the top and the human hand at the bottom.

OUR COMPETITION

CONTEXTLY

Our product reveals emotional tone in Slack in real time; something competitors don't offer

Simple, seamless integration with no workflow change

Built for remote teams and HR teams who need clarity and early detection of miscommunication.

COMPETITORS

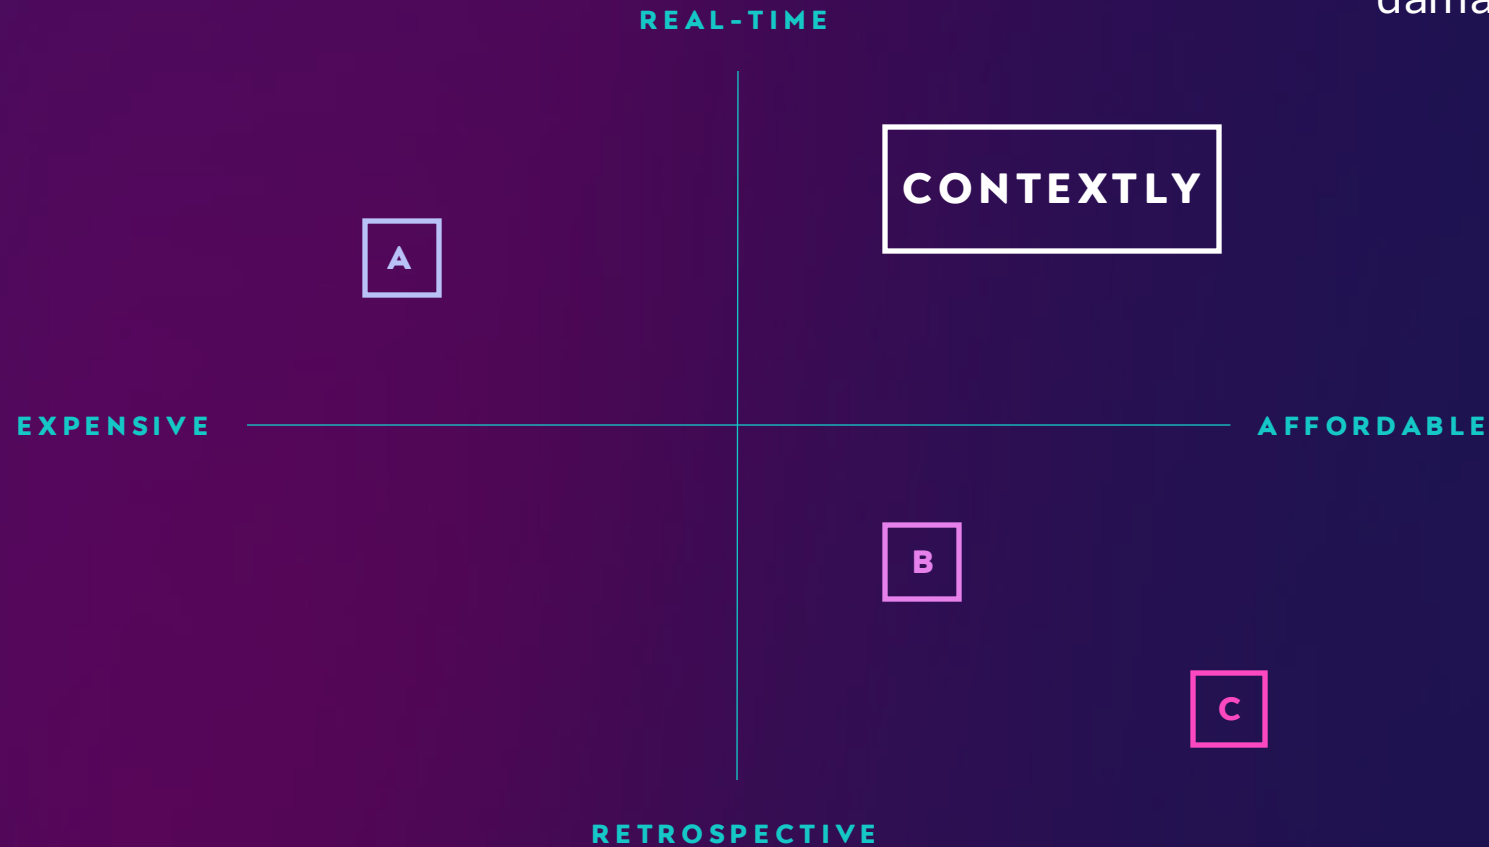

General Tools (e.g., Slack plugins) [A]
Provide basic sentiment or analytics, but not multi-emotion real-time tone detection.

People Ops Platforms (Culture Amp)[B]
Offer surveys and dashboards, but insights come *after* problems arise, not during conversations.

AI Writing Assistants[C]
Help rewrite messages, but don't visualize emotions or improve team-wide communication dynamics.

COMPETITION

For HR and People Ops,
CONTEXTLY reduces hidden
communication risks that
surveys only discover after
damage is done

LIVE DEMO

NEXT STEPS

ML

- Larger, domain-specific dataset
- Emotion smoothing across conversations
- Improved accuracy and context awareness

Business

- Pilot with small remote teams and HR partners
- Gather qualitative feedback from managers and People Ops
- Refine pricing model (per-seat vs team-based)
- Expand beyond Slack to Microsoft Teams
- Develop analytics dashboard for leadership insights

SUMMARY

- Miscommunication is a costly problem in remote work.
- CONTEXTLY uses ML to surface emotional tone in real time.
- Integrated directly into Slack, with minimal friction and clear business value.
- Built to scale responsibly across teams and platforms.

THANK YOU
